OBJECTIVE

Final-semester Information Management student with a strong foundation in user needs analysis, information structuring, and IT systems, transitioning into UI/UX design. Currently building practical design skills through self-directed Figma projects and seeking an internship to apply user-centered thinking in a real product environment.

EDUCATION

Prime College ,Tribhuvan University(2022)

Bachelor of Information Management(BIM)

- Completed coursework in Software Design and Development, Database Management Systems, Business Information Systems, E-Commerce and Internet Marketing, and IT Project Management.
- Developed programming knowledge through academic studies in PHP, Java, and Python
- Gained an understanding of user-centered design principles, information systems, and digital business solutions through the BIM curriculum.

RELEVANT SKILLS

- Design & UX: Figma, Wireframing & Prototyping, User Research, User-Centered Thinking
- Tools: Canva, Power BI, MS Office, Excel
- Technical: HTML, CSS, JavaScript, Java, Python, C, MySQL/SQL
- Other: Requirements gathering, process mapping, workflow analysis, cross-functional collaboration, attention to detail

PROJECTS

Booktoria — Bookstore Website Redesign

[July 2026]

- Redesigned a live bookstore website (Booktoria) to solve key UX gaps in discovery and product trust
- Identified critical issues through user flow audit missing book descriptions/review and no bestseller discovery.
- Applied UX principles to reduce purchase friction and improve buyer trust — addressing patterns known to cause cart abandonment in e-commerce
- Designed 4 high-fidelity screens (Homepage, Search/Browse, Book Detail, Cart) addressing information gaps and reducing purchase friction
- Introduced bestseller section, review system, advanced filtering, and transparent pricing breakdown to improve buyer confidence

CERTIFICATIONS & SELF-LEARNING

- Code Academy UI/UX course
